

Kuraray Liquid Rubber

kuraray

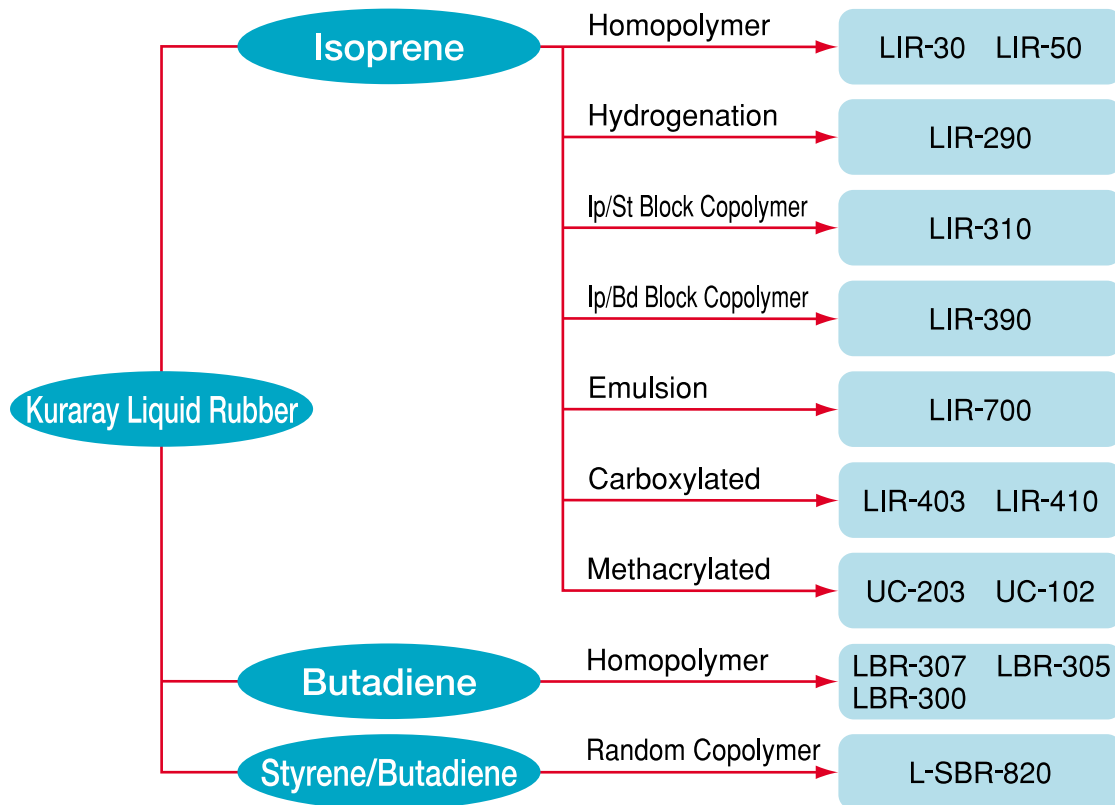

Liquid Isoprene Rubber (“LIR”) Liquid Butadiene Rubber (“LBR”)

- LIR/LBR is a viscous liquid rubber based on isoprene and /or butadiene, which was originally synthesized by Kuraray Co., Ltd.
- LIR/LBR is colorless, transparent and almost completely odorless.
- LIR/LBR has a function as a “Reactive plasticizer.”
In terms of function as a “Plasticizer”, LIR/LBR is the rubber with the highest molecular weight among materials which have the plasticizing function.
In terms of function as a “Reactive”, it is “vulcanizable”.
LIR/LBR is co-vulcanizable and /or co-crosslinkable with solid rubber such as NR, SBR, BR and EPDM using sulfur or peroxide.
- Some LIR/LBR grades are crosslinkable by reaction of its functional groups and are crosslinkable by UV irradiation.

Grades of “LIR/LBR”

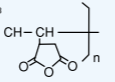

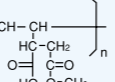

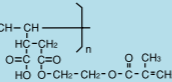

Applications of “LIR/LBR”

When functioning as a “Reactive plasticizer” and as “Crosslinkable”, LIR/LBR can be applied to the following applications.

Typical properties of “LIR/LBR”

Category	Type	Grade	Structure	Number of functionality in a molecule	Molecular Weight	Melt Viscosity (Pa·s at 38°C)	Specific Gravity(g/cc)	Glass Transition Temp. (°C)	Features	Main applications
LIR (Isoprene)	Homopolymer	LIR-30	$\left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH}_2 \right]_n$	—	28,000	70	0.91	-63	<ul style="list-style-type: none"> • Good compatibility with diene Rubbers. • Well-balanced adhesive properties. 	<ul style="list-style-type: none"> • Reactive plasticizer (NR, IR, SBR, BR) -Tire, Roll- • Pressure sensitive adhesives • Sealants (Automobile)
		LIR-50		—	54,000	500	0.91	-63		
	Block Copolymer	LIR-310	$\left[\text{CH} - \text{CH}_2 \right]_m \left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH}_2 \right]_n$	—	32,000	1,400	0.92	-63	<ul style="list-style-type: none"> • Good compatibility with SIS. • Superior in Softness. • Superior in heat resistance. 	<ul style="list-style-type: none"> • Hot melt adhesives (SIS, SBS, EVA) • Sealants (Automobile)
		LIR-390	$\left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH}_2 \right]_m \left[\text{CH}_2 - \text{CH} = \text{CH} - \text{CH}_2 \right]_n$	—	48,000	400	0.88	-95		
	Carboxylated	LIR-403	$\left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH}_2 \right]_m \left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH} \right]_n$ 	3	34,000	200	0.92	-60	<ul style="list-style-type: none"> • Crosslinkable by metal compounds, epoxy compounds, isocyanate compounds, amine compounds. • Good adhesion with metals and fibers. 	<ul style="list-style-type: none"> • Modifier of adhesion between rubber and metal, fabric.-Belts, Hose, Footwear- • Pressure sensitive adhesives • Sealants (Automobile)
		LIR-410	$\left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH}_2 \right]_m \left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH} \right]_n$ 	10	30,000	430	0.92	-59		
	UV cure	UC-102 UC-203	$\left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH}_2 \right]_m \left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH} \right]_n$ 	2	17,000	30	0.90	-60	<ul style="list-style-type: none"> • Reactive at low temperature. • Crosslinkable by UV. 	<ul style="list-style-type: none"> • Pressure sensitive adhesives (UV Crosslinkable)
3				35,000	190	0.90	-60			
Hydrogenated	LIR-290	$\left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} - \text{CH}_2 - \text{CH}_2 \right]_m \left[\text{CH}_2 - \overset{\text{CH}_3}{\text{C}} = \text{CH} - \text{CH}_2 \right]_n$	—	31,000	1,500	0.86	-59	<ul style="list-style-type: none"> • Good compatibility with EPDM, SEPS and SEBS. • Superior in heat and weather resistance. 	<ul style="list-style-type: none"> • Reactive plasticizer (EPDM) • Hot melt adhesives (SEBS, SEPS)

When using LIR/LBR, please confirm related law and regulations, and examine its safety and suitability for the application.

For medical and health care applications, please contact your LIR/LBR representative for specific recommendations.

LIR/LBR should not be used in any devices or materials intended for implantation in the human body.

Packaging

Available in both cans and film pouches. Film pouches are preferred when dealing with a viscous polymer.

* Packaging could vary by grades, please confirm the details with your LIR/LBR representative.

Can style

Drum 150kg, 165kg
5 gallon can 15kg
